1 More Reconstruction Results

More reconstruction results on *DTU* [1] *evaluation* dataset, *Tanks and Temples* [20] and *BlendedMVS* [38] are presented in Fig. 1, Fig. 2 and Fig. 3 respectively.

Fig. 1. Reconstruction results on DTU [1] evaluation set.

* Equal Contribution.

† Corresponding Author

Fig. 2. Point cloud reconstruction results on *Tanks and Temples* [20] benchmark. Our method can generate denser, more accurate, delicate and complete point cloud than all presented other methods.

Fig.3. Point cloud reconstruction results on *BlendedMVS* [38] benchmark. Our method presents strong generalization on different scale objects especially on large-scale scenes **without any finetuning**.
